Problem 3: Finding Complexity using Counter Method

Started on	Monday, 24 August 2026, 12:47 PM
State	Finished
Completed on	Monday, 24 August 2026, 6:39 PM
Time taken	5 hours 52 mins
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 Correct Mark 1.00 out of 1.00 Flag question

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:
A positive Integer n
Output:
Print the value of the counter variable

Answer:

```
#include <stdio.h>

void Factor(int num)
{
    int count = 0;

    for (int i = 1; i <= num; ++i)
    {
        count++;

        count++;

        if (num % i == 0)
        {
            count++;
        }
    }

    count++;

    printf("%d", count);
}

int main()
{
    int n;
    scanf("%d", &n);

    Factor(n);

    return 0;
}
```

```
1 #include <stdio.h>
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔
✔	4	12	12	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
